SUMMARY

Java Backend Developer with 1+ year of experience building and enhancing enterprise applications using Java, Spring, REST APIs, JSP, Servlets, and Liferay DXP. Experienced in developing Liferay MVC components, optimizing SQL queries, integrating backend services, and collaborating in Agile teams using Git, Maven, and JIRA. Passionate about building scalable backend solutions and transitioning into full-time Spring Boot and Microservices development roles.

EXPERIENCE

Programmer Analyst — Cognizant

June 2025 – Present

- Developed and enhanced enterprise insurance portal applications using **Java, JSP, Servlets, and Liferay DXP**.
- Built and customized **Liferay MVC portlets, hooks, themes, and service layers** to implement business requirements and improve portal functionality.
- Integrated **RESTful APIs** with Liferay modules for seamless communication between frontend components and backend services.
- Implemented UI enhancements using **JSP, JavaScript, HTML, and CSS** across multiple application modules.
- Optimized **SQL queries** and backend logic to improve application performance and efficient data retrieval.
- Performed debugging, root-cause analysis, and code fixes while ensuring application stability in production.
- Managed builds using **Maven**, collaborated through **Git** and **JIRA**, and worked with cross-functional teams in an Agile environment.

PROJECTS

Banking Application | Java, Spring Boot, React.js, MySQL

- Developed a full-stack banking application using **Spring Boot** with secure **JWT-based authentication** and role-based authorization.
- Designed and implemented **RESTful APIs** for account management, transactions, and user operations following layered architecture principles.
- Integrated a responsive **React.js** frontend with Spring Boot backend services and MySQL for persistent data management.
- **GitHub:** [Banking Application](#)

OLX Clone | React.js, Node.js, Express.js, MongoDB

- Developed a full-stack marketplace application enabling users to create, manage, and purchase product listings.
- Built **REST APIs** using Node.js and Express.js, integrating MongoDB for efficient data storage and retrieval.
- Integrated frontend and backend components to deliver a seamless user experience across core marketplace workflows.
- **GitHub:** [OLX Clone](#)

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, HTML, CSS

Backend: Spring, Spring Boot, Spring MVC, Hibernate, Servlets, REST APIs, Liferay DXP

Frontend: JSP, React.js, HTML, CSS, JavaScript

Cloud & Databases: AWS (EC2, S3, RDS, VPC, Lambda, CloudWatch, SNS, SQS, CloudFormation), MySQL, MongoDB

Developer Tools: Git, GitHub, Maven, Docker, Jenkins, Postman, JIRA

Core Concepts: Microservices, JWT Authentication, MVC Architecture, CI/CD, Unit Testing (JUnit, Mockito), Agile Methodologies

EDUCATION

Parul University

Bachelor of Technology in Computer Science with Artificial Intelligence

2021 – 2025

CGPA: 8.42/10.00

CERTIFICATIONS

- AWS Certified Cloud Practitioner [\(Verify\)](#)
- Microsoft GitHub Copilot Certification [\(Verify\)](#)
- Master Microservices with Spring Boot, Docker & Kubernetes (Udemy) [\(Verify\)](#)

ACHIEVEMENTS

- Secured a **Top 10 position** in an AI/ML Hackathon at Parul University by developing a **Llama 3-based AI assistant** for medical advice and symptom triaging.
- Participated in **PU CodeHackathon**, developing backend logic, database integration, and secure **REST APIs** for a voting application using Java, Spring Boot, Spring Data JPA, MySQL, and React.js.
- Earned a **4-star Problem Solving** badge on HackerRank, demonstrating strong analytical and coding skills.
- Solved **150+ LeetCode problems**, strengthening proficiency in data structures and algorithms.
